| Notizen        |  |
| Anzahl / Datum |  |

### Elektrisch

|                                                     |
|-----------------------------------------------------|
| SK2                                                 |
| 60 W                                                |
| Dim 1-10V                                           |
| min 110 V                                           |
| max 305 V                                           |
| $\eta$ 87 %                                         |
| Not yet specified! (use PM Converter Output Window) |
| min 50 Hz                                           |
| max 60 Hz                                           |
| konstante Stromstärke 350 mA                        |

### Abmessungen

|                                          |
|------------------------------------------|
| Länge 176 mm   Breite 45 mm   Höhe 32 mm |
|------------------------------------------|
