

## Protokoll

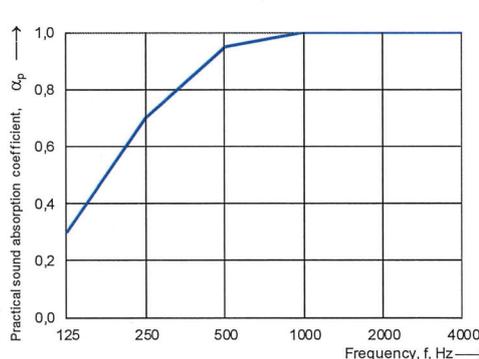

Sound absorption coefficient according to ISO 11654																											
Measurement of sound absorption coefficient in a reverberation room																											
Client: XAL GmbH, Auer-Welsbach-Gasse 36, AT-8055 Graz	Date of test: 28.05.2018																										
Description: <b>Produktname: MUSE FAMILY</b>																											
Object: Aufbau des Prüfkörpers gemäß EN ISO 354, Punkt 6.2.1																											
<p>Aufbau bestehend aus insgesamt 10 Stück MUSE FAMILY (10x je 1600 mm x 760 mm x 45 mm, L x B x H) in einem Abstand von d = 50 mm zueinander.            Abstand zum Boden jeweils mit 4x Holzklötzchen (80 mm x 50 mm x 200 mm, L x B x H) hergestellt.            Keine umlaufende Rahmenkonstruktion vorhanden.</p> <ul style="list-style-type: none"> <li>• PK-Fläche: 13,06 m<sup>2</sup> = 4,02 m x 3,25 m</li> <li>• Abstand vom Boden zur Unterkante des Prüfkörpers: d ~200 mm</li> </ul>
